## **TWMA – Article for P&J’s coverage of OE**

**Leading international environmental services specialist Total Waste Management Alliance (TWMA) is exhibiting as part of the Scottish pavilion at this year’s Offshore Europe, celebrating a highly successful 2009 to date with multi-million pound contract wins in the UK and globally.**

The company has recently commissioned several new TCC-RotoMill units at its Peterhead site. These can be based both on and offshore to recycle the by-products of the drilling industry. In addition, a further fully mobile version of the technology, the TCC-RotoTruck, has also been brought into service.

“We viewed it as absolutely essential to exhibit at OE09. This may be a challenging time for the industry but there is work out there and the exhibition is an excellent opportunity to make connections that will lead to additional projects for us,” said TWMA managing director Ronnie Garrick.

TWMA has secured more than £12million of work in the North Sea so far this year and is continuing to expand internationally with senior appointments and investment in infrastructure at its bases. Staff are also making the most of TWMA’s new HQ location in Aberdeen, at Broadfold Road, close to the AECC. Clients have been invited to visit the new premises and find out more about the business which now employs more than 310 people in the UK and at bases in Egypt, Nigeria, Norway, Dubai, Libya and Kuala Lumpur.

Mr Garrick added: “Our stand at this year’s exhibition will provide an ideal platform to showcase our package of integrated environmental services to the market.

“We recently moved into our new global headquarters in Aberdeen and restructured our operations to help us better serve growing demand from our customers around the world so it is vital for us to communicate clearly to our existing and potential customers who we are and what we do.”
